

# OMS<sup>®</sup> v5.0.1

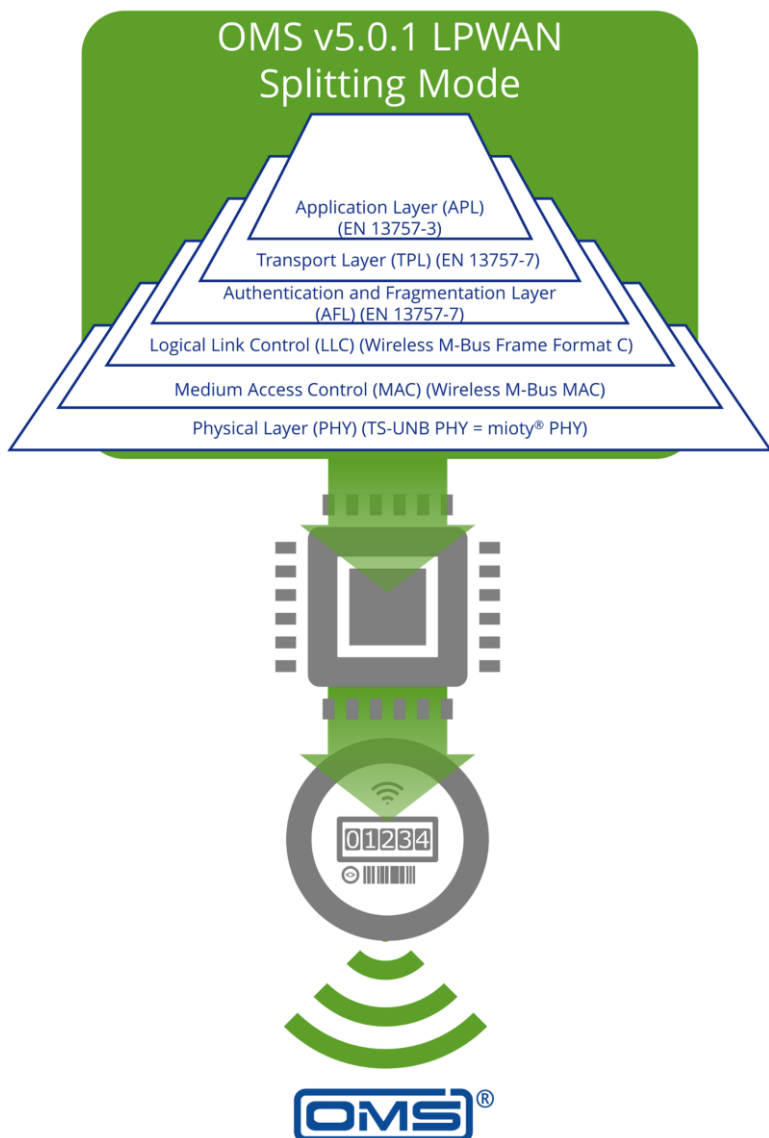

## LPWAN SPLITTING MODE (UL-S1)

OMS<sup>®</sup> v5 – the new generation of the OMS<sup>®</sup> stack is making its way into the metering world. With this generation you get a powerful product that merges the OMS<sup>®</sup> specification with the Physical Layer of the mioty<sup>®</sup> LPWAN technology, specified according to TS-UNB – ETSI TS 103357.

Use this stack to introduce your OMS<sup>®</sup> customers to a product that is not only

characterized by excellent robustness thanks to the integration of telegram splitting technology, but also has a significantly greater range than previous OMS<sup>®</sup> versions.

With the new OMS<sup>®</sup> generation, you can offer your customers high-performance products with the option of expanding their fields of application in their existing OMS<sup>®</sup> networks.

Compliant to EN 13757 and OMS<sup>®</sup> Specification, implementing Gen. 5 Annex Q "OMS<sup>®</sup> LPWAN"

Excellent robustness due to the implementation of the telegram splitting technology

Significantly higher range of the new OMS<sup>®</sup> generation compared to the previous version

Pre-certification on reference hardware platform

## SUPPORTED SPECIFICATIONS

Compliant according

- EN 13757 and OMS® Specification, implementing Gen. 5 Annex Q "OMS® LPWAN"
- TS-UNB – ETSI TS 103357

## STACK FEATURES

- Unidirectional transmission [UL-S1] in asynchronous mode
- OMS® security profiles A & B
- Short and long TPL header (CI-fields 7Ah and 72h)
- Physical parameters [UL-S1], according to Telegram Splitting Ultra Narrow Band (TS-UNB) profile EU0

## REFERENCE HARDWARE

**STM32L072CZ + SX1276**

verified on B-L072Z-LRWAN1

## STACK CHARACTERISTICS

Memory Requirements\*

	Library	Applications, HAL, Drivers, other software
Flash	~ 23 kB	~ 33 kB
RAM	~ 2,9 kB	~ 1,3 kB

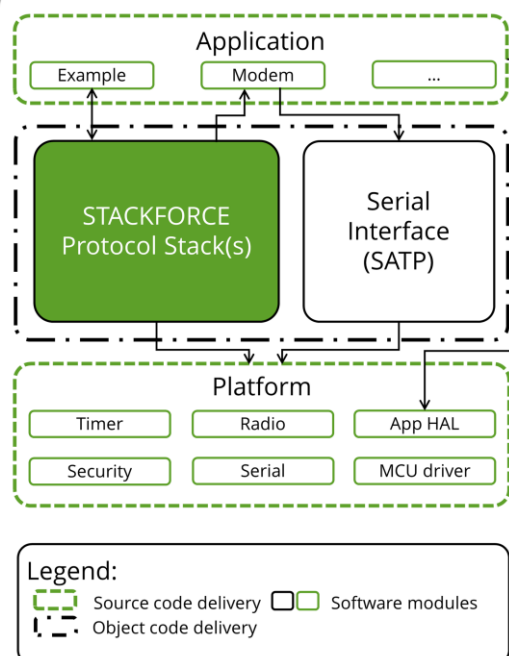

- Already included **400 bytes RAM** to typical stack library due to dynamic memory allocation (\_RAM).

\* The code sizes described above specify the typical required memory for operating the full featured protocol stack as a library including related drivers. Values based on reference hardware.

## STACK PACKAGE ARCHITECTURE

STACK PACKAGE

## YOUR BENEFITS

The OMS® v5 stack generation enables a high degree of device interoperability.

Combination of the interoperability of OMS® applications and the great robustness and range of mioty®.

Platform Interface enabling customization and fine tuning of Platform Driver.

With a directly available OMS® v5.0.1 Standard Stack you shorten your time-to-market significantly.
